1. This application is in condition for allowance except for the following formal matters:

Claim 39 is objected to because of the following informalities: the term "wavelength" (line 5) should read "wavelengths" and the term "said" should be inserted before "saturation" (line 14).

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

2. The following is a statement of reasons for the indication of allowable subject matter: Applicant cites numerous references regarding measurement of the saturation of a blood constituent which include processing to minimize the influence of motion induced noise on the measured value, but none of the prior art teaches or suggests a method that includes irradiating a subject with three wavelengths of light, sensing the intensity of the radiation which has passed through a portion of the subject at all three wavelengths, representing each signal as a function of the coefficients set forth in the claim, and solving the functions to obtain a value of the saturation.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
